

SELVAM S

INFRASTRUCTURE ENGINEER | AZURE & AWS CLOUD ADMINISTRATION | CLOUD OPERATIONS & PRODUCTION SUPPORT

Hosur, Tamil Nadu, India | +91-8072442693 | selvamselvarasu81@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Infrastructure and Cloud Engineer with 2+ years of hands-on experience administering and patching Windows and Linux servers across enterprise Azure and AWS environments. Currently managing OS and PaaS patch cycles across 50+ critical servers using Azure Maintenance Configuration for patch automation, within 3-hour maintenance windows and zero unplanned downtime. Provision and support Windows and Linux environments across 50+ Azure subscriptions and 25+ AWS accounts, and automate infrastructure provisioning with Terraform and Ansible. Have hands-on experience with Active Directory user and group access, along with DNS/DHCP configuration. Strong in production troubleshooting across servers, networking, and cloud platforms, with a focus on systematic root-cause analysis to resolve issues effectively and reduce recurrence. Handle ITSM-based incident, change, and problem management as a primary SPOC for platform support, with strong ticket ownership and first-call resolution. Comfortable working in rotational and 24x7 production support environments. Azure Administrator Associate (AZ-104) certified, with AWS Cloud Practitioner Essentials completed.

CORE COMPETENCIES

Server Provisioning & Patch Automation • Strong Troubleshooting & Root Cause Analysis • Incident, Change & Problem Management • Multi-Cloud Administration (Azure/AWS) • Active Directory, DNS & DHCP • Infrastructure as Code (Terraform & Ansible) • Ticket Ownership & First Call Resolution

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (50+ Subscriptions), Amazon Web Services (25+ Accounts)

Server Administration & Patching: Windows Server, Linux (Ubuntu, Amazon Linux, RHEL, SUSE), Azure Maintenance Configuration (Patch Automation), OS & PaaS Upgrades

Identity & Directory Services: Active Directory (User/Group Administration), DNS, DHCP

Infrastructure as Code: Terraform, Azure Bicep, ARM Templates, Ansible

Incident & Service Management: ITSM Ticketing, Incident Management, Change Management, Problem Management, First Call Resolution (FCR)

Troubleshooting: Production Troubleshooting, Root Cause Analysis, Log & Metrics Analysis, Network & DNS Troubleshooting

Networking: VNet, VPC, NSG, Subnets & Routing, Load Balancer, App Gateway, Azure Firewall, VPN Gateway, ExpressRoute, DNS

Databases: Microsoft SQL Server (Azure SQL/MSSQL), PostgreSQL & MySQL Flexible Server, Cosmos DB, Amazon RDS

Monitoring & Observability: Azure Monitor, Log Analytics, Application Insights, AWS CloudWatch

Cloud Security: Microsoft Defender for Cloud, SentinelOne, CSPM, Cloud VAPT, Azure Policy, AWS SCP, IAM, RBAC

Automation & Scripting: PowerShell, Bash, Python, Azure CLI, Azure Automation Account

Backup & Disaster Recovery: Azure Site Recovery (ASR), Recovery Services Vault, RTO/RPO Validation

PROFESSIONAL EXPERIENCE

TVS Electronics | Client: TVS Motor Company | Hosur, India

Senior Associate Cloud Engineer

Jul 2024 – Present

Administer and patch enterprise Windows and Linux environments across Azure and AWS for TVS Motor Company and group entities, supporting production operations across Dev, UAT, and Production.

Server Provisioning, Patching & Environment Support

- Provision and administer Windows and Linux environments across 50+ Azure subscriptions and 25+ AWS accounts, supporting Dev, UAT, and Production environments.
- Own OS and PaaS patch cycles across 50+ critical servers using Azure Maintenance Configuration for patch automation, completing rollouts within 3-hour maintenance windows with no unplanned downtime.
- Supported and gained hands-on experience with Active Directory user and group access, along with DNS and entries (External/Internal), DHCP configuration.

Incident, Change & Problem Management

- Serve as primary SPOC for Azure and AWS platform support, owning ticket triage, first-call resolution, and escalation coordination through the ITSM ticketing tool.
- Perform root cause analysis on production incidents spanning infrastructure, networking, DNS, and routing — cutting average resolution time from 4 hours to 1 hour.

- Troubleshoot complex production issues across Windows, Linux, networking, and cloud platform layers by working through logs and monitoring data step by step until the root cause is isolated and fixed.
- Support change and problem management processes by documenting root causes, remediation steps, and follow-up actions to reduce recurring incidents.

Infrastructure as Code & Automation

- Automate infrastructure provisioning with Terraform and configuration tasks with Ansible, reducing deployment time from 5 hours to 2 across compute, networking, and PaaS resources.
- Script recurring administrative and patching workflows using PowerShell, Bash, and Python.

Monitoring, Security & Production Support

- Monitor production health using Azure Monitor, Log Analytics, and Application Insights to identify and address infrastructure issues proactively.
- Support cloud VAPT remediation by triaging and resolving vulnerabilities flagged by SentinelOne and Microsoft Defender for Cloud, contributing to a 40% reduction in overall risk exposure.

Backup, DR & Team Support

- Run backup and restoration testing on a regular cadence, validating recovery against RTO/RPO targets using Azure Site Recovery (ASR) and Recovery Services Vault.
- Mentor 5 associate engineers within a 25-member cloud engineering team and participate in rotational 24x7 production support.

KEY PROJECTS

Server Patch Automation & Maintenance Management

Automated OS and PaaS patch cycles using Azure Maintenance Configuration across 50+ critical Windows and Linux servers, reducing manual patching effort while maintaining zero unplanned downtime.

Technologies: Azure Maintenance Configuration, Windows Server, Linux, Azure Automation

Infrastructure Automation

Automated provisioning and configuration of cloud resources end to end, cutting deployment time from 5 hours to 2 and standardizing environment setup.

Technologies: Terraform, Ansible, Azure DevOps

Cloud Security & Vulnerability Management

Rolled out Azure Policy, AWS SCP, and CSPM controls across the environment, then worked through remediation of the resulting vulnerability and misconfiguration backlog across 100+ cloud resources.

Technologies: Azure Policy, AWS SCP, CSPM tooling, Microsoft Defender for Cloud, SentinelOne

Disaster Recovery & Backup Validation

Configured and stress-tested disaster recovery for production workloads, running restoration drills to confirm RTO/RPO targets hold up in practice, not just on paper.

Technologies: Azure Site Recovery (ASR), Recovery Services Vault

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) — Completed
- AWS Cloud Practitioner Essentials — Completed
- Azure Solutions Architect Expert (AZ-305) — In Progress

EDUCATION

Bachelor of Technology in Information Technology — Adhiyamaan College of Engineering (Anna University, Chennai) | 2020–2024 | CGPA: 8.78 — First Class with Distinction

RECOGNITION AWARDS & LEADERSHIP

- Hi-Flyer Award, 2026–2027 — TVS Electronics, recognized for contributions to cloud infrastructure and security management at TVS Motor Company.
- Promoted from Cloud Engineer to Senior Associate Cloud Engineer (Apr 2026) for consistent technical contributions and operational excellence.
