

SELVAM S

Senior Associate Cloud Engineer | Cloud Security & Networking | DevOps & Site Reliability Engineering

Hosur, Tamil Nadu, India | +91-8072442693 | selvamselvarasu81@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Associate Cloud Engineer with 2+ years of hands-on experience securing and operating enterprise-scale Azure and AWS infrastructure across 50+ subscriptions, 250+ virtual machines, and 100+ cloud resources spanning Dev, UAT, and Production. Promoted from Cloud Engineer in April 2026 for consistent delivery in cloud security and compliance (Microsoft Defender for Cloud, Palo Alto Cortex, Tenable, SentinelOne, CSPM, VAPT remediation), hybrid network architecture (VNet/VPC, Azure Firewall, WAF, Private Endpoints, ExpressRoute), and container platforms (AKS, Amazon EKS). Builds CI/CD automation and Infrastructure as Code with Azure DevOps, AWS CodeBuild/CodePipeline, and Terraform, and drives SRE practices through observability with Azure Monitor, Log Analytics, Site24x7, and Grafana. Identified and remediated vulnerabilities using Tenable and SentinelOne, reducing enterprise security risk exposure by 30%. Azure Administrator Associate (AZ-104) certified; AZ-305 (Solutions Architect Expert) in progress.

CORE COMPETENCIES

Cloud Platforms: Azure, AWS • Security & Governance: Zero-Trust, CSPM, VAPT Remediation, RBAC, IAM • Infrastructure & Networking: Hybrid Architecture, VNets, VPCs, ExpressRoute, WAF • DevOps & IaC: CI/CD Pipelines, Terraform, Bicep, Ansible • Containers: Kubernetes (AKS/EKS), Docker • SRE & FinOps: Observability, Incident Management, Cost Optimization, DR/ASR

TECHNICAL SKILLS

- **Cloud Security & Governance:** Microsoft Defender for Cloud, Palo Alto Cortex, Tenable, SentinelOne, Matters.AI (DSPM), Azure Policy, AWS SCP, Azure Key Vault, IAM, RBAC, CSPM, VAPT Remediation, Compliance
- **Networking & Zero-Trust:** Azure VNet, AWS VPC, Subnets, NSG, Security Groups, Azure Firewall, Application Gateway, WAF, Private Endpoints, Private Link, Azure Bastion, Azure Route Server, ExpressRoute, VPN Gateway
- **DevOps & CI/CD:** Azure DevOps (Pipelines, Repos), AWS CodeBuild, AWS CodePipeline, Git, Terraform, Bicep, ARM Templates, AWS CloudFormation (basic), Ansible, Docker
- **Containers & Orchestration:** Azure Kubernetes Service (AKS), Amazon EKS, Kubernetes
- **SRE & Observability:** Azure Monitor, Log Analytics, Application Insights, AWS CloudWatch, Site24x7, Grafana, Incident Management, Root Cause Analysis
- **Compute & Data Storage:** Azure VMs, VMSS, AWS EC2, Auto Scaling, Azure Functions, Databricks, Data Factory, Blob Storage, AWS S3, Cosmos DB, Azure SQL, AWS RDS, Managed Disks
- **Resiliency, FinOps & OS:** Azure Site Recovery (ASR), Recovery Services Vault, FinOps Cost Optimization, Linux (Ubuntu, RHEL), Windows Server
- **Scripting & Automation:** PowerShell, Python, Bash, Azure CLI

PROFESSIONAL EXPERIENCE

TVS Electronics | TVS Motor Company (Client) — Hosur, India

Senior Associate Cloud Engineer

April 2026 – Present

Promoted from Cloud Engineer for consistent delivery in cloud security, infrastructure reliability, and cross-team leadership across TVS group companies.

- Managing and administrating 50+ Azure subscriptions, 250+ virtual machines, and 100+ cloud resources across Dev, UAT, and Production environments.
- Lead FinOps cost-optimization initiatives — rightsizing analysis, unused resource identification, Intel-to-AMD SKU migration, and Auto Scaling configuration — to improve budget efficiency.
- Serve as senior technical SPOC for security, networking, and application teams, including ownership of production and non-production VNet isolation, partnering directly with the firewall team to enforce network segmentation and access control.
- Centralized security audit visibility by integrating Azure Event Hub log streaming across PaaS databases (MySQL, MSSQL, PostgreSQL, Cosmos DB), Databricks, and AWS Lambda into a unified CSPM platform.
- Lead backup and restoration testing across all PaaS and IaaS services in critical production environments spanning TVS group companies; support Azure OpenAI and Azure AI Search.
- Manage disaster recovery readiness via Azure Site Recovery (ASR) and Recovery Services Vault, executing automated backup and failover testing against RTO/RPO targets.
- Provide production operations support including root cause analysis (RCA), incident management, and capacity planning for critical infrastructure.

Cloud Engineer

July 2024 – March 2026

- Enhanced enterprise security posture by onboarding workloads to Microsoft Defender for Cloud and Palo Alto Cortex via Ansible-automated security endpoint onboarding; identified vulnerabilities using Tenable and SentinelOne and remediated them to reduce risk exposure by 30%.
- Designed secure hybrid network topologies using Azure VNets, AWS VPCs, NSGs, Private Endpoints, Azure Bastion, Azure Route Server, and VPN Gateways to enforce Zero-Trust access.
- Configured application traffic routing and protection using Azure Application Gateway with WAF and Azure Load Balancer; secured cross-premises connectivity via ExpressRoute.
- Enforced compliance and governance across multi-tenant environments through custom Azure Policies, AWS SCPs, and centralized secret management with Azure Key Vault.
- Built CI/CD pipelines with Azure DevOps and AWS CodeBuild/CodePipeline, incorporating automated security scanning and IaC validation into deployment workflows.
- Standardized infrastructure provisioning with reusable Terraform modules, Bicep scripts, and Ansible playbooks, reducing manual configuration effort across environments.
- Deployed and managed Azure Kubernetes Service (AKS) and Amazon EKS clusters, configuring ingress controllers, network policies, and persistent storage for containerized workloads.
- Established observability across Azure Monitor, Log Analytics, Site24x7, and Grafana, enabling proactive alerting and faster incident response.
- Executed minimal-downtime OS upgrades for 50+ critical Windows/Linux servers and supported an Azure EA tenant migration with negligible service disruption.

KEY ENTERPRISE PROJECTS

- **Cloud Governance & Vulnerability Management:** Enforced compliance baselines with Azure Policy, AWS SCP, and CSPM tooling across Azure and AWS; identified vulnerabilities with Tenable and SentinelOne across 100+ resources and remediated them to cut exposure by 30%.
- **Secure Hybrid Cloud Network Architecture:** Connected on-premises datacenters with Azure and AWS using ExpressRoute, VPN Gateway, VNet Peering, Private Link, Virtual WAN, Azure Firewall, and WAF.
- **Multi-Tier Application Containerization:** Provisioned scalable AKS-based application environments with Terraform, integrated with Azure Data Factory and Databricks.
- **Disaster Recovery & Infrastructure Automation:** Automated VM provisioning and DR protocols via Terraform, Azure DevOps, and Ansible, with Azure Site Recovery configured to meet RTO/RPO targets.
- **Centralized CSPM & Audit Log Integration:** Streamed audit logs from Azure PaaS databases and AWS Lambda into a centralized CSPM platform via Azure Event Hub, improving cross-cloud security visibility.
- **Cloud Security Tool Evaluation (POC/POV):** Piloted UpWind, Palo Alto Cortex, and Matters.AI (a DSPM platform) to strengthen VAPT management and data security posture.
- **FinOps Cost Optimization:** Migrated Azure VMs from Intel-based to AMD-based SKUs across eligible workloads and implemented Auto Scaling and automated VM start/stop schedules using Azure Automation Account to reduce idle compute spend.

CERTIFICATIONS & EDUCATION

- Microsoft Certified: Azure Administrator Associate (AZ-104) — Microsoft
- Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — In Progress
- AWS Cloud Practitioner Essentials — AWS Training & Certification
- Microsoft Enterprise Skills Initiative (ESI) Advanced Cloud Training — Completed
- B.Tech, Information Technology — Adhiyamaan College of Engineering, Hosur (2020 – 2024)

AWARDS & LEADERSHIP

- **Promoted to Senior Associate Cloud Engineer (April 2026):** TVS Electronics — recognized for sustained impact in cloud infrastructure, security management, and cross-team leadership at TVS Motor Company.
- **Hi-Flyer Award (2026–2027):** TVS Electronics — awarded for outstanding contributions to cloud infrastructure and security management at TVS Motor Company.
- **Alumni Speaker — AI & Innovation Sprints:** Delivered a workshop for engineering students on Agile/SAFe methodologies applied to rapid AI-driven prototyping and iterative development.
